

Minel General Electric company is participating together with the Faculty of Mechanical Engineering in Belgrade at the Innovation Fund Collaborative Grant Scheme Program with the Project: **High Reach Pantographs for High-Speed Railways** (project ID: 50369)

Main project objective is development of a High Reach Pantograph for speeds up to 200 km/h that will reduce time needed for transport of cargo and allow doubling capacity of overall railway system.

We are inviting you to take part in the public consultation on our Project's **Environmental Management Plan**.

The Environmental Management Plan (Mitigation and Monitoring plans) is accessible on our official site.

Due to the project innovation nature, only planned milestones of the project quarters are available.

Please be free to make comments, give suggestions and pose questions (whether on English or Serbian language) regarding the Environmental Management Plan at the following e-mail: mge@minelge.rs

Public consultation lasts till January 31st, 2022.
